

AI Tools

In recent years, a lot of AI Tools have been developed to help aid in improving workflow and efficiency in projects. Here are a few AI Tools that are available on the internet and can be used:

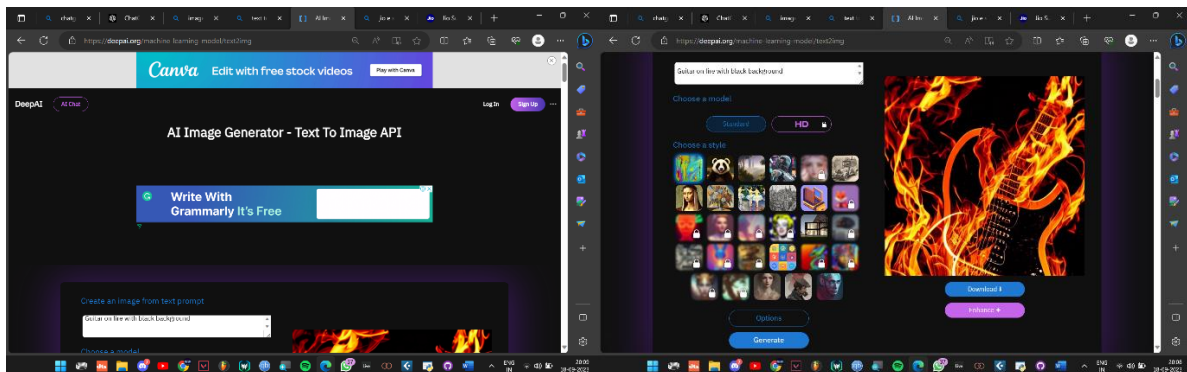

1) ChatGPT

ChatGPT is an AI tool which is text-to-text in nature and has many uses. It can develop codes as well as also answer day to day questions, just like a regular chatbot too.

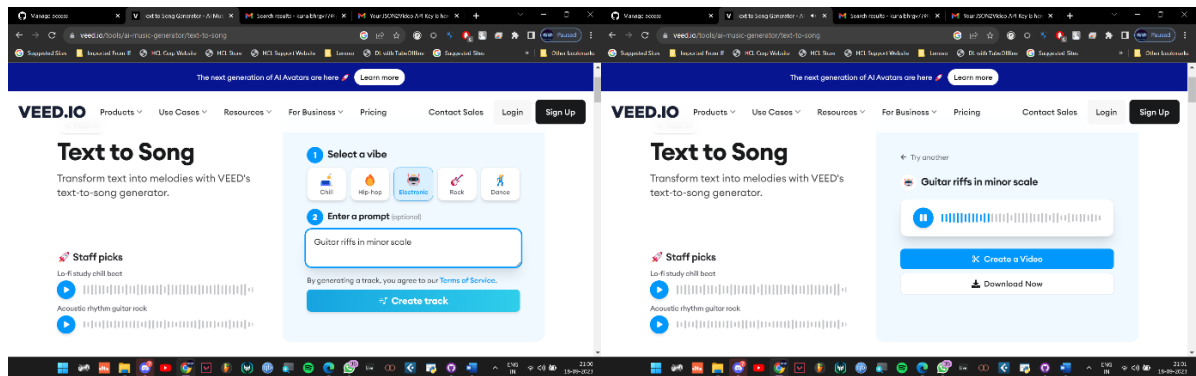

2) DeepAI

DeepAI is a text-to-image generator which takes prompts in text format and then outputs an image depending

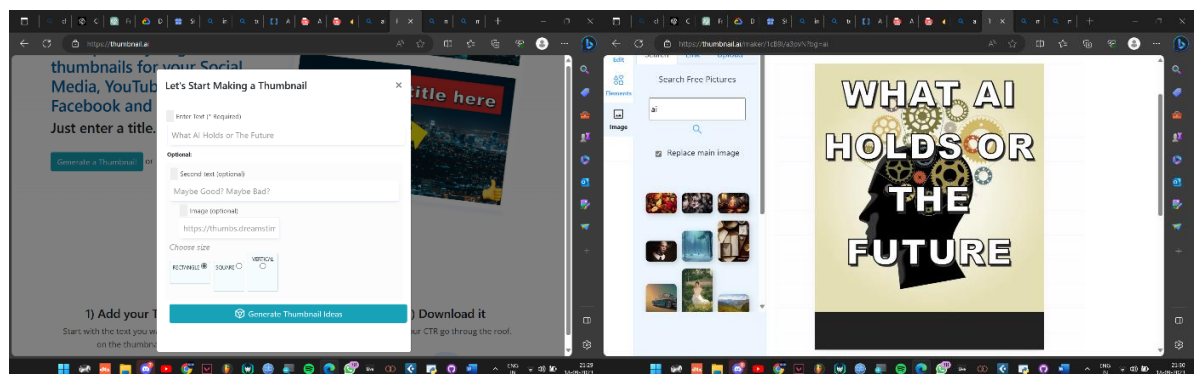

3) VEED.IO

Veed.io is an API that takes text prompt to make music and it creates a short track on the basis of selected preference as well as the additional prompt text box that affects the music according to your preferences.

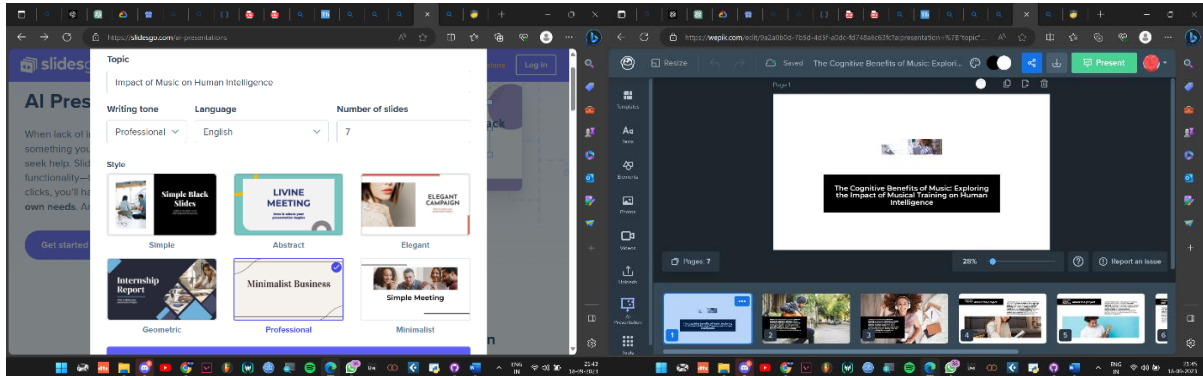

4) Thumbnail.ai

Thumbnail.ai is a thumbnail creator which takes an image link and adds your desired text over on to the image and displays it as a thumbnail for your videos.

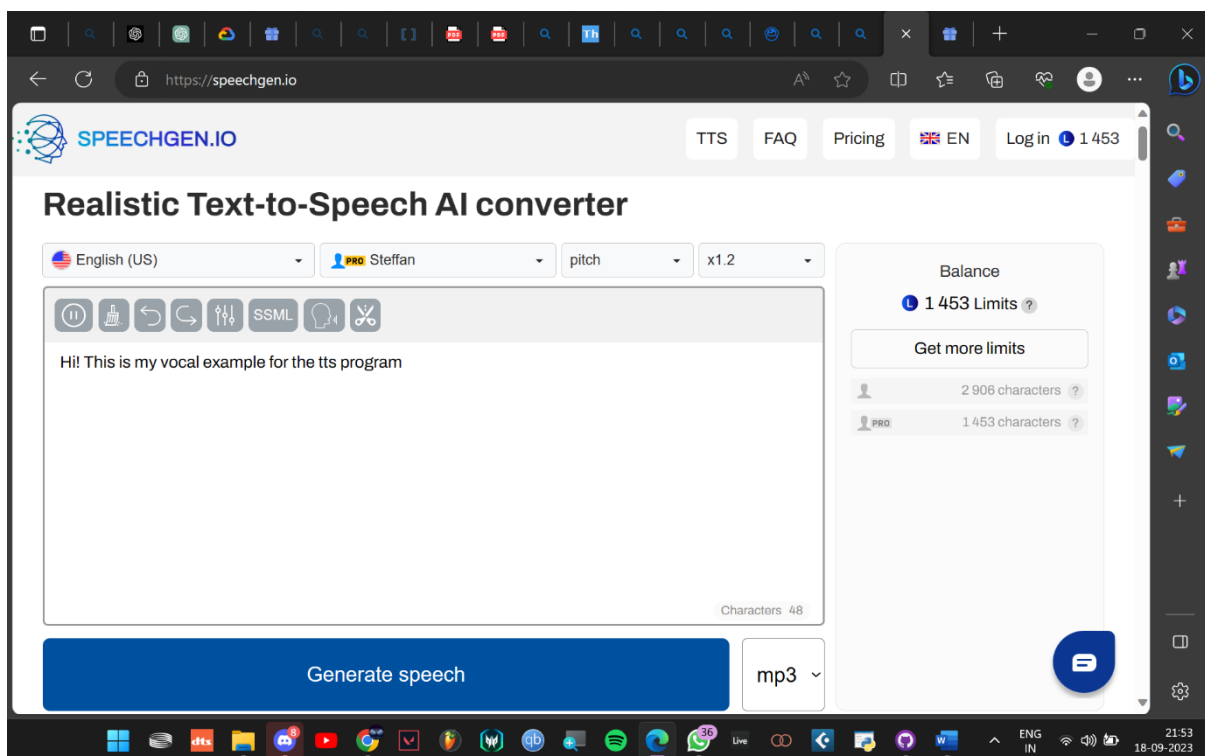

5) Slidesgo

Slidesgo is a convenient and easy to use AI tool to create presentations of more than 6 slides. It takes a prompt from the user and creates presentations on the basis of the type of tone required, style, pages etc.

6) Speechgen.io

Speechgen.io is an AI Text-to-Speech tool which implements neural learning to mimic real human voices and also speak more naturally. Since this is a speech output I do not have a screenshot for the output.
